To enhance the coherence of the group for the mutual benefit, blessing and growth.

*The Soul is a globe or star of light
above our heads.*

*We visualize it coming into our
bodies, resting in my head & heart
& directing our lives.*

THE SOUL INVOCATION

**I AM THE SOUL
I AM THE LIGHT DIVINE
I AM LOVE
I AM WILL
I AM FIXED DESIGN**

*We use our creative imaginations
to place these words in the hearts
& minds of humanity
- across each nation & country &
across the Earth.*

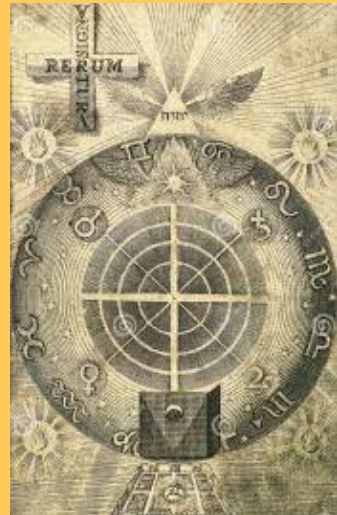

Something new is happening
for humanity.

A new kingdom.

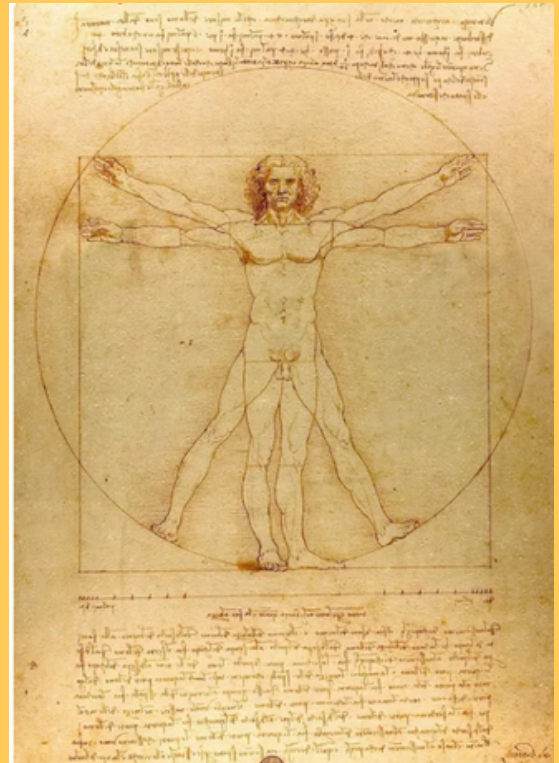

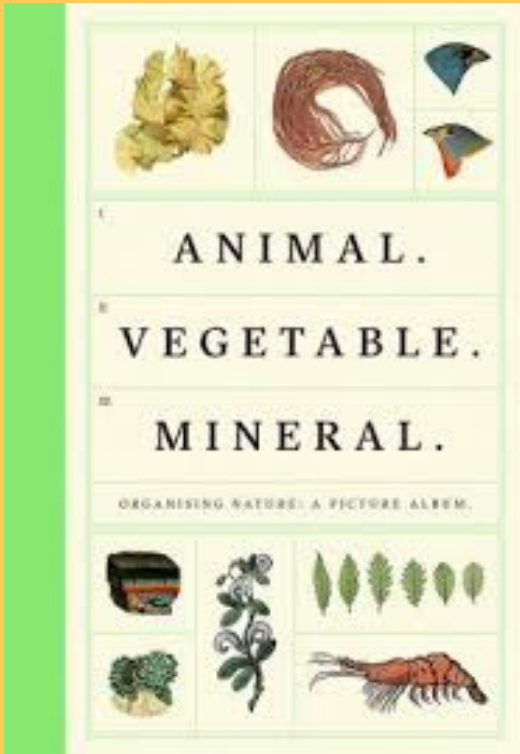

We have the mineral, plant,
animal & human kingdoms.

And now a new light is coming forth
for humanity, the Light of the Soul.

What is the Soul?

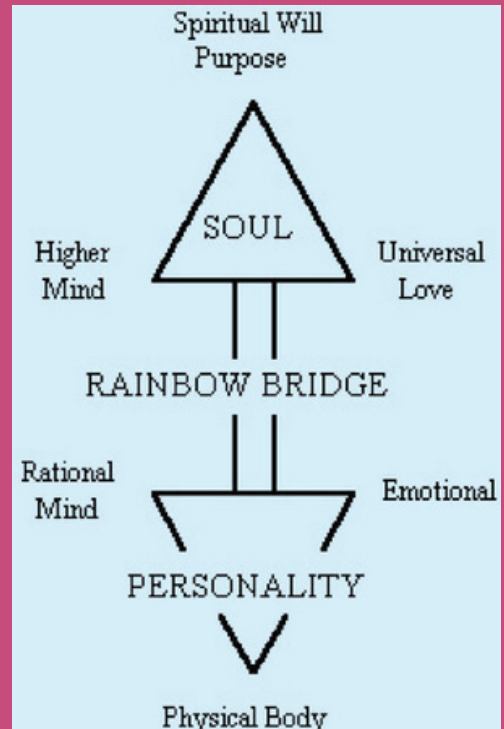

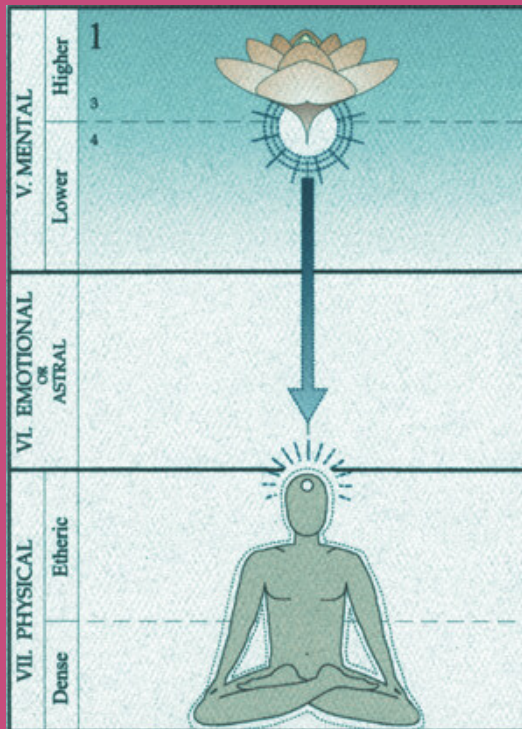

It's the new kingdom of Light & awareness for humanity.

*The Soul for humanity...
It's an intermediary vehicle of Light.
Created by the Father, in order to
step down His fiery energy, His Will,
Love, Wisdom & Intelligence.*

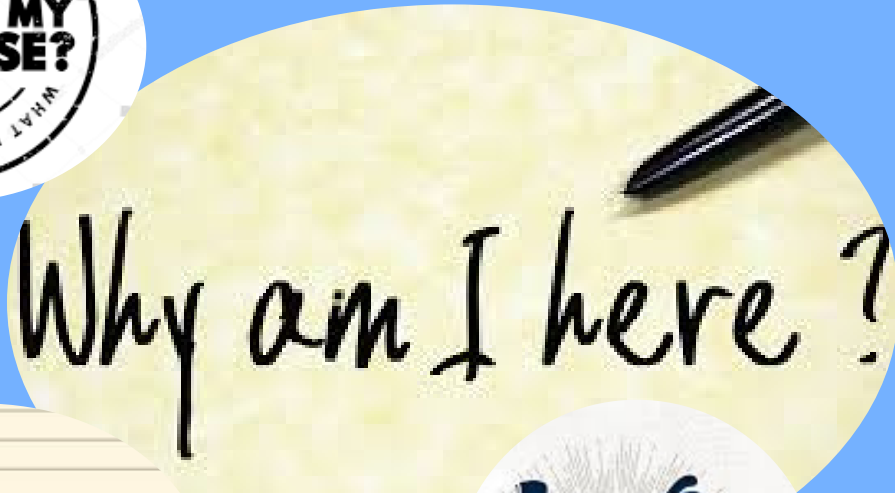

Humanity lives in its physical body,
 emotions & lower mind for thousands
 & thousands of years,
 learning how to live in form & matter.
 Then comes a lifetime when the person
 experiences something different.

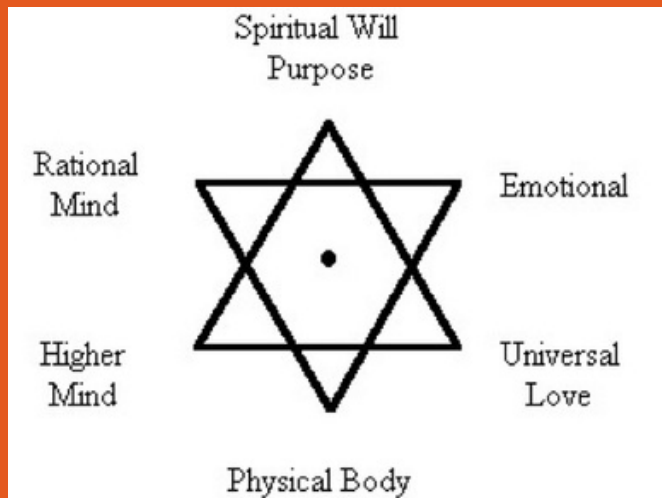

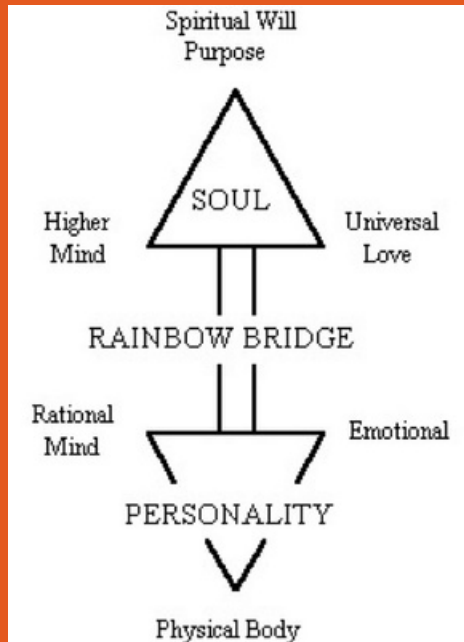

One begins to ask certain questions
never asked before.

There is great unease & questioning
and a quest begins.

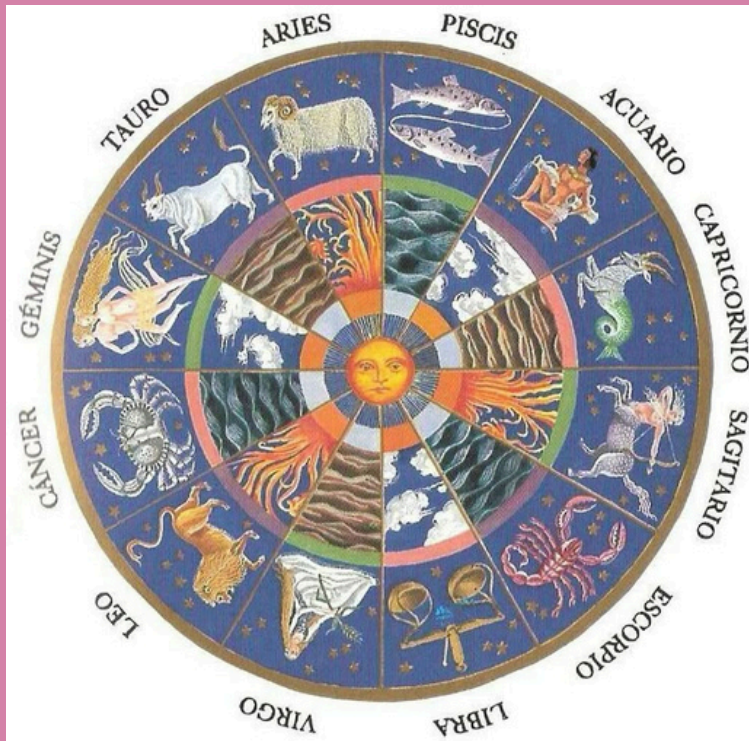

The Personality and The Soul

*Each sign of the zodiac is one aspect
of the Light of the Soul.*

*In the diamond light of the soul,
each sign is a facet of Soul Light.*

There are 12 petals around the heart.

The Soul directs & guides us.

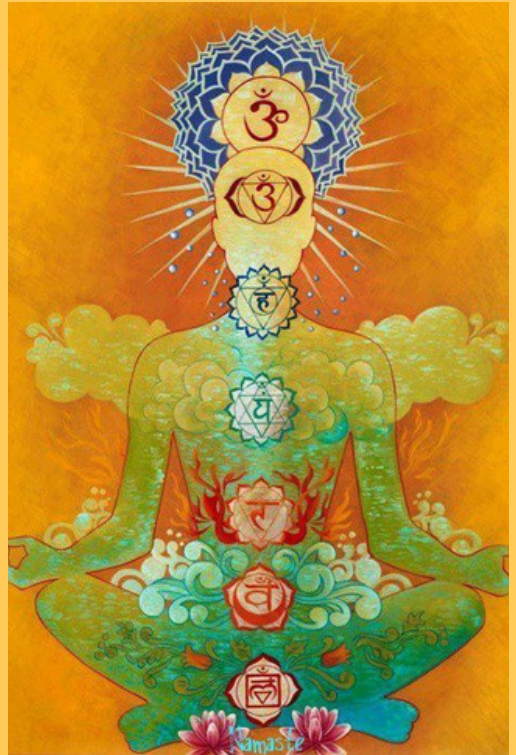

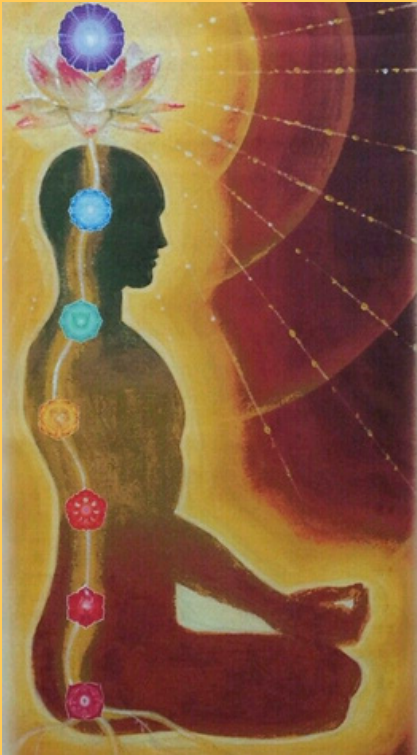

The Soul is a Light.

A searchlight we can turn it in all directions.

It's a healing mechanism.

It's our friend & companion.

The Soul is our higher self (like Venus is the other sister of our Earth).

*We visualize our Soul & send the light
of our Soul to another's Soul.
This is the work of Mercury -
the messenger,
who IS the Light of the Soul.
The outer garment of the Soul is
the outer garment of God.*

*Visualizing the two triangles joining & fusing.
And then all of us together
in the six-pointed star.
Where we meet as
a Soul group together.*

Artist

"The images originate from an idea."

"The idea leads to different stages of expression."

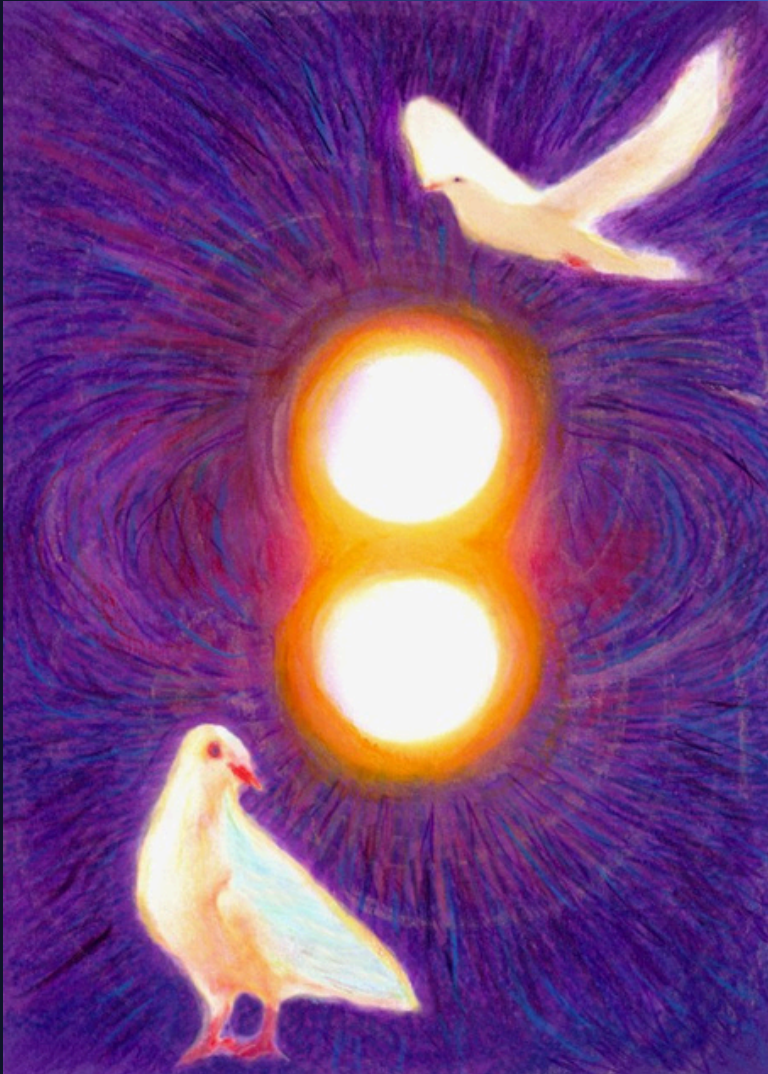

"The "original" is the idea; this "original" cannot be sold nor bought."

Approaching The Paintings

We consider these questions

- *What symbols do I see in the painting?*
- *What do I notice in the painting? Mercury - revealing information.*
- *Do the symbols mean anything to me?*
- *What does the painting say to me?*
- *What do I sense and feel when looking at this painting? Is anything stirred within me?*
- *What do I think the artist is trying to convey?*
- *What questions do I have about the painting?*

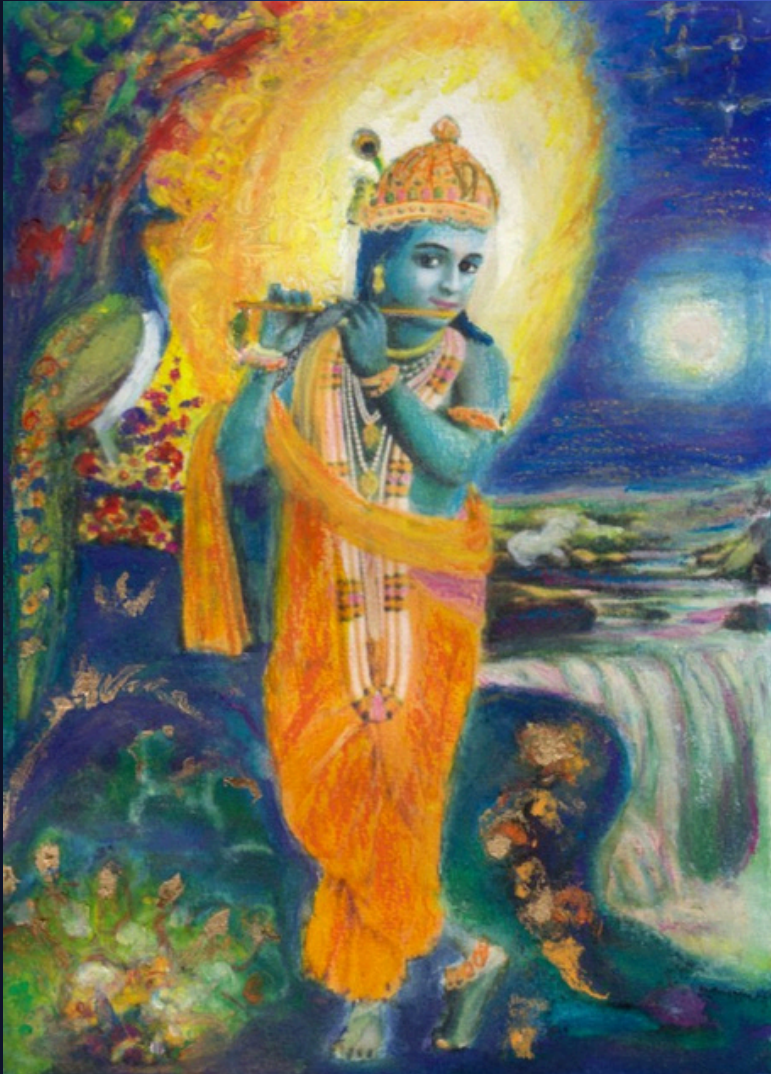

*Libra- The Upper and the Lower Bird
and the Magnetism of Life*

Fishing the Souls

Sagittarius- Fiery Alignment

Music of the Soul Full Moon

Opening the Sheaths of the Soul
Towards the Greater Light

We bow down to the Wisdom of the East.
We bow down to the Love of the South.
We bow down to the Strength of the West.
We bow down to the Will of the North.
We bow down to the Headlight *Chintamani* above.
We bow down to the great Guarding Dog below.
We bow down to the Lord of I AM, the centre.

May we be raised.
May we be raised.
May we be raised,
to the Kings of Beauty!
